**3 C88-03-016 - The City of St. Helena, Town of Yountville, County of Napa, Napa Valley Vintners Association vs. Napa Valley Wine Train, Inc.**

[5267]

Following decisions by the Court of Appeal and the California Supreme Court, this decision denies Petition for Modification filed by Wine Train and closes this proceeding. The denial leaves standing Decision 01-06-034, in which the Commission determined that Wine Train's excursion service is not a public utility service.

- 4**  
[5360]      **A05-10-010 - Southern California Gas Company (SoCalGas).**  
All natural gas consumed in California is subject to a surcharge to pay for public purpose programs. Guardian Industries Corp. (Guardian) employs 300 persons in California and threatens to move its operations out of state unless it gets a gas rate equivalent to its out-of-state offer. SoCalGas signed a 15-year agreement with Guardian which lowered the gas surcharge in order to keep Guardian from leaving the state. The Division of Ratepayer Advocates and The Utility Reform Network opposed on the ground §890 prohibits discounting the surcharge. Held - Agreement approved. The need to retain Guardian in California was compelling. The Commission has the authority to discount the surcharge when it finds the public will benefit, in this case by preventing the loss of jobs and increasing gas revenues which otherwise would be lost. This proceeding is closed.

Consent Agenda - Orders and Resolutions (continued)**12                   A02-03-032 - California Water Service Company (CalWater).**

[5411]           For an order establishing a moratorium on new service connections in excess of 250 service connections in the Coast Springs Water System Division of the Redwood Valley District. CalWater's petition for modification of D03-03-037 is granted as set forth. The expiration date for the Coast Springs water system new connection moratorium established in D03-03-037 is extended to August 31, 2006. The one-year lead time discussed in D03-03-037 for filing an application to extend the expiration date was not an order and therefore need not be extended. Instead, this decision establishes the August 31, 2006 moratorium expiration date as that filing deadline and authorizes a further moratorium extension when the application is filed, effectively granting CalWater the relief it seeks. This application is closed.

**13                   C05-04-007 - Havasu Lakeshore Investments, LLC. vs. Havasu Water Company.**

[5413]           This decision dismisses the complaint filed by Havasu Lakeshore Investments, LLC. (HLI) against Havasu Water Company (HWC) with prejudice. HLI asked for dismissal without prejudice, but because it claims the dispute is moot, the Commission finds it appropriate to put a stamp of finality on this controversy by dismissing the complaint with prejudice. HWC does not oppose dismissal. HLI, the developer of a 320-unit vacation mobile home community called Vista Del Lago near Lake Havasu in San Bernardino County, filed the complaint seeking water service from HWC, a Class D water company with approximately 210 customers. HLI has since found an alternative water source, and no longer seeks Commission intervention in its dispute with HWC. This proceeding is closed.

[5416]                    **Casmite Water System.**

A03-12-024 - Related matters. In D05-11-030, effective November 18, 2005, the Commission imposed a penalty of \$1.8 million against The Union Oil Company of California (Unocal), calculated at \$500 per day for the ten-year period the company aided and abetted The Casmite Corporation (Casmite) in the operation of a water utility without a certificate of public convenience and necessity. The imposition of the monetary sanction against Unocal for violation of Pub. Util. Code § 2111, was suspended on the condition that Unocal submit to the Executive Director, within 60 days of the effective date of D05-11-030, an unconditional release of any and all claims against Casmite for loans or advances made before the effective date of the decision. On January 10, 2006, Unocal's attorney of record transmitted to the Executive Director the certificate of Unocal's assistant secretary indicating that Unocal's board of directors had adopted a resolution effectuating an unconditional release of all claims for loans or advances made to Casmite. Unocal has satisfied the conditions imposed by the Commission for avoiding the imposition of the monetary sanction. C03-09-001 and A03-12-024 are closed.

[5417]                    **Inc. (MAP).**

This decision grants defendant MAP's motion to dismiss this complaint without prejudice on the grounds that the Federal Communications Commission (FCC) is considering many, if not all, of the issues in a case filed about four months before the instant complaint. If the issues between Pacific and MAP are not resolved in the FCC action, Pacific may petition this Commission to reopen this case to resolve those issues. C05-11-016 is closed.

- 17**  
[5423] **A04-07-020 - Southern California Water Company.**  
Application regarding Low Income Assistance Programs for its Bear Valley Electric Service customers for program year 2005. In the underlying application, Bear Valley Electric Service (Bear Valley) proposed a budget of \$82,825 for its 2005 Low-Income Energy Efficiency program. However, by the time a decision was issued in July 2005 authorizing its funds as requested, Bear Valley had apparently already spent more than that amount. Bear Valley continued to spend sums in excess of its authorized amount and filed its Petition for Modification on December 30, 2005, seeking an increase in its 2005 budget from \$82,825 to \$177,160. This decision denies this part of Bear Valley's request because to do otherwise would constitute retroactive ratemaking. However, the decision modifies D05-07-014 to authorize Bear Valley to spend up to \$177,160 for Low-Income Energy Efficiency program activities in 2006. This proceeding is closed.

Application to revise its electric marginal costs, revenue allocation, and rate design. This decision awards The Utility Reform Network (TURN) \$121,609.95 in intervenor compensation for its substantial contributions to D05-11-005. The award is a reduction of \$313 from TURN's request based on an adjustment in the hourly rate for one expert, in conformance with the principles and guidelines adopted in D05-11-031. D05-11-005 adopted a settlement on marginal cost, revenue allocation, and limited rate design matters, plus a supplemental settlement on residential rate design items, in this phase of Applicant's 2003 general rate case. [5286]

**A04-12-014 - Southern California Edison Company (SCE).**

I05-05-024 - Related matters. This decision addresses the general rate increase request of the Southern California Edison Company (SCE). For test year 2006, SCE is authorized a revenue requirement of \$3,704,039,000, which reflects an increase of \$287,862,000 or 8.43% over the previously authorized level of \$3,416,177,000. The adopted methodology for calculating post-test year revenue requirements results in additional revenue requirement increases of \$137,982,000 (3.73%) for post-test year 2007 and \$190,141,000 (4.95%) for post-test year 2008. On a general rate case (GRC) revenue basis, when reflecting the effect of increased sales for the test year and post-test years, the revenue increases amount to \$228,202,000 (6.57%) for 2006, \$68,173,000 (1.81%) for 2007 and \$101,623,000 (2.59%) for 2008. On a total system revenue basis, the revenue increases amount to 2.29% for 2006, 0.67% for 2007 and 0.98% for 2008. These proceedings are closed.

**R05-09-006 - Order Instituting Rulemaking concerning broadband over power line deployment by electric utilities in California.**

This decision adopts a regulatory framework that fosters competition in the broadband market by providing regulatory certainty to California companies seeking to provide broadband over power lines (BPL). The benefits of BPL include a new “wired” broadband pipe to the home, promoting universal access to broadband services, and providing California electricity consumers with increased reliability and lower costs through new “smart grid” technologies. This decision is: (1) allowing third-parties or electric utility affiliates to provide BPL services; (2) protecting ratepayers and aligning financial risks and rewards; (3) adopting a mechanism for sharing any additional revenues received from BPL providers; (4) providing non-discriminatory access to utility poles and rights of way; (5) maintaining the safety and reliability of the electric distribution system; and (6) adopting a policy of exempting BPL-related transactions, with conditions, from the requirements of Pub. Util. Code § 851 pursuant to the Commission's authority under Pub. Util. Code § 853(b).

## Regular Agenda - Energy Orders (continued)

**55a ALTERNATE TO ITEM 5349**

[5457]

The alternate draft decision varies from the draft decision in four key areas. The alternate Decision finds the energy affiliate rules are more appropriate for energy companies providing broadband over powerline (BPL) service in some capacity on their networks. In order to ensure acquisition of BPL rights on a network is not used to limit broadband paths to the home the alternate decision sets a five year "use it or lose it" period. The alternate decision adopts the "other operating revenue" (OOR) sharing mechanism as detailed in Decision 99-09-070, but it finds that, under the landlord/tenant arrangement, the investment is "passive" rather than "active" and applies the 70/30 rather than 90/10 shareholder/ratepayer sharing arrangement. Finally, the alternate decision waives the application of Pub. Util. Code Section 851 for purposes of the lease of BPL rights, but in order to prevent the effect of a sale of permanent PBL rights, it caps lease length at twenty years. The alternate decision also finds that no BPL lease shall extend beyond the year 2031 without a Section 851 proceeding or an application to continue to waive Section 851.

**57 A04-12-004 - San Diego Gas & Electric Company (SDG&E) and Southern California Gas Company (SoCalGas).**

[5442]

This decision addresses the system integration proposal of SDG&E and SoCalGas, which seeks to combine the transmission-related costs of both utilities. The combined costs are allocated to the customers of SDG&E and SoCalGas to develop integrated transmission rates, which allows customers of either utility to transport gas from any existing or new receipt point at a single integrated transmission rate. The system integration proposal is adopted.

This approval authorizes PacifiCorp to establish a Klamath Transition Memorandum Account and to seek recovery of the shortfall tracked in that memorandum account in subsequent hearings to be held in this proceeding. **R\_\_\_\_\_ - Order Instituting Rulemaking to examine the Commission's post-2005 energy efficiency policies, programs, evaluation, measurement and verification, and related issues.**

This Order Instituting Rulemaking will address the Commission's policies, programs and evaluation, measurement and verification (EM&V) activities related to post-2005 energy efficiency activities administered by Pacific Gas and Electric Company, Southern California Edison Company, San Diego Gas & Electric Company, and Southern California Gas Company. The focus of the Commission's efforts in this rulemaking will be to further refine the policies, programs and EM&V related to the "next generation" of energy efficiency activities in 2006 and beyond. In particular, consistent with its direction in D05-09-032, the Commission will evaluate a shareholder risk/reward incentive mechanism for energy efficiency as the next priority. This rulemaking will also be the forum for considering further refinements to the EM&V protocols and, as warranted, in this rulemaking the Commission will address refinements to the energy efficiency policy rules, including reporting requirements. For the longer term, the Commission plans in this rulemaking to update its energy efficiency savings goals based on further studies of energy efficiency potential. This rulemaking, or its successor proceeding, will also be the forum for initiating the next planning cycle for 2009-2011 energy efficiency program plans, funding levels, and related issues. In issuing this OIR, the Commission closes Rulemaking 01-08-028.

**61 (Rev.) R\_\_\_\_\_ - Order Instituting Rulemaking to implement the Commission's Procurement Incentive Framework and to examine the integration of Greenhouse Gas emissions standards into procurement policies.**  
[5493]

The Commission opens this Order Instituting Rulemaking today to implement the Procurement Incentive Framework adopted in Decision 06-02-032, and to consider adoption and implementation of a Greenhouse Gas (GHG) emissions performance standard, per the Commission's October 6, 2005 GHG Policy Statement. The Commission recognizes the need to open a new rulemaking that focuses on these issues in order to effectively coordinate GHG emission reduction policies and associated implementation steps for utility energy procurement. Opening this rulemaking moves the Commission forward in meeting the objectives of the Energy Action Plan and the statewide GHG reduction targets established for California.

**I05-04-018 - Investigation on the Commission's own motion into the operations and practices of MCI, WorldCom, or MCI WorldCom, to determine whether it has violated the laws, rules and regulations governing the way in which consumers are billed for products or services, by billing its former customers for a monthly service charge without authorization.**

This decision approves a settlement of the Commission's investigation into slamming and cramming activities of MCI, WorldCom, and MCI WorldCom (collectively, MCI). Both parties to the proceeding have agreed to the settlement. The decision finds that the settlement is (1) reasonable in light of the whole record, (2) consistent with the law, and (3) in the public interest, in accordance with Commission Rule 51.1(e). Thus, the decision approves the settlement and dismisses this Order Instituting Investigation (OII) with prejudice. Under the parties' Settlement Agreement, attached hereto as Appendix A, MCI will pay \$2.3 million, in addition to credits it has already paid to affected customers. (MCI estimates its past credits to be in excess of \$1 million.) The \$2.3 million will be allocated in three parts: (1) \$1 million in credits for period October 1, 2005 through May 31, 2007. MCI will pay up to \$1 million of the \$2.3 million settlement figure in refunds or credits to customers affected by the conduct alleged in the OII. This \$1 million will cover payments issued and to be issued for the period October 1, 2005 through May 31, 2007. (2) \$1.3 million payment to state General Fund within 30 days of this decision. MCI will also make a payment of \$1.3 million to the state General Fund within 30 days after the Commission's approval of the Settlement Agreement. (3) Potential further payment to state General Fund. If the payments in (1) above are less than \$ 1 million, as evidenced by an accounting MCI will make no later than September 30, 2007 of how the settlement proceeds were distributed, it will pay the balance to the state General Fund. This proceeding is closed.

**R03-08-018 - Order Instituting Rulemaking to review policies concerning intrastate carrier access charges.**

This decision reduces intrastate access charges by eliminating two non-cost based charges - the network interconnection charge and transport interconnection charge. Local exchange carriers are authorized to impose a surcharge on local service customers to recover lost revenue from independent long distance carriers. Transfers from affiliated long distance carriers are not included in lost revenue calculation because they do not make actual payments but only "paper transfers." Phase III of the proceeding will address local exchange carriers other than Verizon and SBC California.

**R03-04-003 - Order Instituting Rulemaking on the Commission's own motion to comply with the mandates of Senate Bill 1563 regarding deployment of advanced telecommunications technologies.**

This decision awards Greenlining Institute (Greenlining), Latino Issues Forum (LIF), and The Utility Reform Network (TURN) compensation for their substantial contributions to D05-05-013. Today's awards will be paid from the Commission's intervenor compensation program fund as follows: Greenlining, \$7,007.23; LIF, \$71,118.60; TURN, \$56,087.67. These awards are, in each case, smaller than those requested. Greenlining's original request of \$10,620.73 is reduced to conform the requests with the Commission's policies on attorney fee levels and appropriate activities to be compensated. LIF's original request of \$163,926.22 is reduced to reflect the Commission's policies on attorney fee levels, appropriate activities for compensation, and reasonable hours spent on related activities. TURN's original request of \$62,443.67 is reduced to conform to the Commission's policies regarding attorneys' hourly fees. This proceeding is closed.

**A04-07-018 - Southern California Water Company (SCWC).**

In 1994, SCWC sold certain water rights to the City of Folsom without Commission approval. In 2004, the Commission determined that SCWC should have sought approval pursuant to §851 for the sale, and ordered SCWC to file such an application. The Commission also found that the ratepayers paid for the water rights but ordered the retrospective revenues from the sale shared 70% to ratepayers and 30% to shareholders because the water rights were surplus to SCWC's needs and shareholders should be rewarded for the transaction. In this application, SCWC sought § 851 approval of the permanent sale but was unable to show that the water rights would never be needed to serve its customers. Due to the risk that higher-priced resources would be needed in the future, this decision holds that the perpetual sale was not in the public interest, and denies § 851 approval. Similarly, shareholders are not entitled to a reward for this transaction, so the revenues need not be shared. This proceeding is closed.

**R04-09-003 - Order Instituting Rulemaking on the Commission's own motion for the purpose of considering policies and guidelines regarding the allocation of gains from sales of energy, telecommunications, and water utility assets.**

This decision adopts a process for allocating gains on sale received by certain electric, gas, telecommunications and water utilities when they sell utility land, assets such as buildings, or other tangible or intangible assets formerly used to serve utility customers. In most cases, utility ratepayers should receive 75% of the gain, based on our finding that ratepayers bear most of the risk associated with owning such property. The utilities' shareholders should receive the remaining 25% of the gain on sale. This rule of thumb will apply to routine asset sales where the after-tax sale price is \$50 million or less, or where the gain or loss from the sale is \$10 million or less. Most ordinary asset sales that come before this Commission for approval should meet these criteria. The rule we develop here will not apply where the after-tax asset sale price exceeds \$50 million or the gain or loss exceeds \$10 million. The rule also does not apply to utility sales of assets of extraordinary character; sales of nuclear power plants; where a party alleges the utility engaged in highly risky and non-utility-related ventures; or where a party alleges the utility grossly mismanaged the assets at issue. **ALTERNATE TO ITEM 5106**

This decision adopts a process for allocating gains on sale received by certain electric, gas, telecommunications and water utilities when they sell utility land, assets such as buildings, or other tangible or intangible assets formerly used to serve utility customers. In most cases, utility ratepayers and ratepayers should split the gains 50-50 based on our finding that both bear risks associated with owning such property. This rule of thumb will apply to routine asset sales where the after-tax sale price is \$50 million or less, or where the gain or loss from the sale is \$10 million or less. For depreciable assets subject to routine retirement and salvage, ratepayers will receive all of the gain or loss associated with these assets. Most ordinary asset sales that come before this Commission for approval should meet these criteria. The rules we develop here, however, will not apply where the after-tax asset sale price exceeds \$50 million or the gain or loss exceeds \$10 million. The rule also does not apply to utility sales of assets of extraordinary character; sales of nuclear power plants; where a party alleges the utility engaged in highly risky and non-utility-related ventures; or where a party alleges the utility grossly mismanaged the assets at issue. **R \_\_\_\_\_ - Order Instituting Rulemaking for the purpose of amending General Order 156.**

The Commission institutes this rulemaking to amend General Order (GO) 156 regarding the process for verifying and determining the eligibility of women, minority, and disabled veteran business enterprises for utility procurement contract opportunities. Under the existing GO, these functions have been administered by the Commission, pursuant to Commission-approved criteria, under a contract with an outside clearinghouse. This rulemaking amends the GO to allow the Commission to authorize a utility-formed entity to operate the clearinghouse. If no utility-formed entity is created or authorized, the amended GO authorizes Commission staff to administer the clearinghouse internally.
